# environmental solutions for sustainable markets in Australia

The Environmental Choice Australia Mark ecolabelling program is the national product life cycle environmental declaration based on internationally recognized standard setting and assessment methodology.

The national program is managed by two distinct organisations:

Good Environmental Choice Australia Ltd. is the standard setting and sustainable consumption market promotions body which develops and declares the ecolabelling standards defining product environmental preference in conformance to ISO 14 024 – International Standard for Third Party Environmental Labelling and Declaration ([www.geca.org.au](http://www.geca.org.au)). GECA is an independent non-profit environmental research and ecolabeling standard setting organisation recognised as the Australian member of an international network of ecolabelling schemes under the Global Ecolabelling Network.

Environmental Assurance (also trading as Good Environmental Choice Services Pty Ltd) is the auditing and certification body with responsibility for product assessment, certification and licensing of products against the declared standards ([www.geca.org.au](http://www.geca.org.au)). GECS is the assessment body for this Program with expertise specific to quality product environmental performance auditing following the principles of ISO 14 010 and ISO 14 024 in it's audit and certification services.

Following an independent audit against the recognition requirements of the Australian Program this declaration outlines key environmental performance attributes of products that have been awarded the "Environmental Choice Australia" label for the Australian market. The Ecolabel is awarded to those products that meet or exceed voluntary standards of environmental performance.

The objectives of the program are to:

- a) Provide incentives for suppliers to reduce the environmental impacts of products sold in Australia;
- b) Provide a clear, credible and independent guide to consumers wishing to take account of environmental factors in their purchasing decisions;
- c) Encourage consumers to purchase products which have lower environmental impacts;
- d) Recognize genuine moves by companies to reduce the adverse environmental impacts of their products;
- e) Aim ultimately to improve the quality of the environment and to encourage the sustainable management of resources.

**DISCLAIMER:**

This report has been prepared by Good Environmental Choice Services Pty Ltd (Environmental Assurance) in respect of a Client's assessment results for product conformity to the requirements of the respective Good Environmental Choice Australia Ltd (GECA) standard. The purpose of this public report is to present summary evidence and overview of the Client's product conformity with the standards or other criteria specified. The content of this report applies only to matters which were evident to Environmental Assurance at the time of the audit within the audit scope. Environmental Assurance does not warrant or otherwise comment upon the suitability of the contents of the report or the certificate for any particular purpose or use. Environmental Assurance accepts no liability whatsoever for consequences to, or actions taken by, third parties as a result of or in reliance upon information contained in this report.

## CERTIFICATION FINDINGS

This range of auto spray products manufactured by Tour-Dex has been assessed against the GECA 17-2007 standard - cleaning products. These products have successfully gained official registration as certified "Good Environmental Choice" products under the Australian Ecolabel Program.

### 3. KEY ENVIRONMENTAL PERFORMANCE FINDINGS

The key environmental performance criteria against which the Tour-Dex products were assessed, and the findings by Environmental Assurance, are provided below.

Criterion	Core Environmental Performance Characteristics
Fit for Purpose	Tour-Dex conducts its quality assurance and control procedures in-house. Tour-Dex operates an onsite laboratory which tests product batches for a number of properties including pH and acidity.
Chemical Requirements	Tour-Dex has provided a signed statement of environmental declaration stating that the ingredient suppliers have not been prosecuted in a court of law for environmental offences over the last 24 months.
Prohibited Substances	The nominated products do not contain any prohibited substances furthermore these products do not contain any restricted fragrances and are water based.
Restricted Substances	The Tour-Dex products under assessment are environmentally benign, non-toxic and comply with this criterion.
Surfactants and Enzymes	Tour-Dex has provided a declaration and test report results from confirming that these products contain readily biodegradable natural substances according to AS4351. No enzymes are used in the production process.
Solvents	Tour-Dex has provided a signed statement affirming that no solvents other than distilled water are used in the products under assessment.
Fragrances and Colours	Tour-Dex has provided a signed statement from affirming that the products contain natural fragrances from natural food extracts.
Other Claims	Tour-Dex has made no other claims.
Packaging and Labelling	Tour-Dex has stated that these products are reusable and recyclable with refills available. In addition these products display instructions for proper use, storage and environmentally responsible disposal instructions.
Compliance to Environmental Regulations	This company does not require an environmental licence to operate. There has been no prosecution in an environmental court of law during the past 24 months, or ever was.
Compliance to Labour Anti-Discrimination and Safety regulations	Tour-Dex provides above award wages to their employees and is covered by public liability insurance. The company has not been the subject of prosecution in a court of law within the past 24 months in relation to applicable labour regulations.

Quantifying key criteria for assurance to the market.

## FURTHER INFORMATION

A detailed verification report is supplied to verified manufacturers regarding the findings of environmental characteristics of their products and evidence of compliance. The verification report can be made available at the sole discretion of the manufacturer.

This EPD has been made available for green purchasing officers, specifiers, and every day Australians seeking to purchase products and services on the basis of functional and overall environmental and human health performance.
